PHOTOGRAPHIC SCIENCE AND ENGINEERING
Volume 7, Number 6, November–December 1963

Photographic Science and Engineering

VOLUME 7–1963; NUMBERS 1–6

TITLE INDEX

Abridged Methods for Determining the Color Contribution of Photographic Objectives
F. GRUM, P. T. SCHARF, AND J. E. SCHLAUCH No. 6, p. 331

Active Species in Development of Silver Bromide and Silver Iodide by Hydroquinone
T. H. JAMES No. 3, p. 164

Advances in Xerography: 1958–1962
C. J. CLAUS No. 1, p. 5

Aerial Photographic Tests for Atmospheric Scattering, Correction of
MILTON D. ROSENAU, JR., FRANK SCOTT, AND WILLIAM F. THIESSEN, JR. No. 2, p. 92

Aerial Photographs, Maximization of Resolution in the Duplication of
E. F. YOST No. 2, p. 126

Aerial Photographs, Relation of Picture Definition of, to Solar Azimuth
R. N. WOLFE AND S. A. TUCCIO No. 2, p. 109

Aerospace Photography, Systematic Design of a High-Acuity Long Focal Length Reconnaissance Objective for
RICHARD J. HEIMER No. 3, p. 157

ANNA, the Geodetic Satellite, Photographic Observations of
PAUL B. SWENSON No. 6, p. 317

ANNA 1-B, Image Orthicon Techniques and Satellite Cinematography:
GRADY T. HICKS No. 6, p. 328

Book Reviews
Abridged Scientific Publications from the Kodak Research Laboratories, rev. by T. H. JAMES No. 1, p. 69
Energieleitung und Energieübertragung aus der Sicht des modernen Gerätebaus, by P. Gorlich, No. 1, p. 69
Engineering and Scientific High-Speed Photography, by William G. Hyzer, rev. by A. E. QUINN No. 3, p. 205
Enlarged Prints from Library Microforms, by William R. Hawken, rev. by T. H. JAMES No. 4, p. 246
Filmdosimetrie, rev. by H. F. NITKA No. 6, p. 369
Geodesy and Aerophotogrammetry, rev. by T. H. JAMES No. 1, p. 69
Korpuskularphotographie IV, ed. by H. Frieser and G. Heimann, rev. by T. H. JAMES No. 4, p. 246
Optical Masers, rev. by T. H. JAMES No. 2, p. 131
Photographic Literature, ed. by Albert Boni, rev. by T. H. JAMES No. 2, p. 131
Photometry Concepts and Measurements, by A. M. Baker, rev. by T. H. JAMES No. 5, p. 313
Polaroid Land Photography Manual, by Ansel Adams, rev. by LESLIE STROEBEL No. 5, p. 313
Principles of Color Sensitometry, rev. by JOHN L. SIMONDS No. 6, p. 369
Schlieren Methods (Notes on Applied Science No. 31), by D. W. Holder and R. J. North, rev. by H. N. TODD No. 5, p. 313
Sensitometry, by Hollis N. Todd and Richard D. Zakia, rev. by JAMES A. EYER No. 3, p. 204

Boundary-Layer Equilibria and Diffusion of Frenkel Defects in Silver Halide Crystals
R. MATEJEC No. 2, p. 123

Calibration of Step Wedges and Density Tablets in the Density Range from 0–4.3
G. W. SCHUMANN No. 5, p. 262

Camera Systems, Panoramic and Serial Frame, for High-Speed, Low-Altitude Reconnaissance, A Comparison of,
J. S. GOLDHAMMER AND F. E. EDWARDS No. 1, p. 53

Carlson, Chester F.: Inventor of Xerography
ALFRED DINSDALE No. 1, p. 1

Cathode-Ray Tube, Unified Approach to Photographic Recording from the
LEO BEISER No. 3, p. 196

Cathode-Ray-Tube Displays, Photography and Photometry of: I. Theory and Photometric Results
RAYEN W. TYLER AND CARLTON STRAUB No. 5, p. 289
II. Photometric Techniques and Instrumentation
RAYEN W. TYLER AND VERNON I. SAUNDERS No. 5, p. 297
III. Photography
FRED C. EISEN, T. GENTRY VEAL, AND RAYEN W TYLER No. 5, p. 300

Chester F. Carlson: Inventor of Xerography
ALFRED DINSDALE No. 1, p. 1

Color Reproduction Theory for Subtractive Color Films
J. Q. UMBERGER No. 1, p. 34

Comparison of Panoramic and Serial Frame Camera Systems for High-Speed Low-Altitude Reconnaissance
J. S. GOLDHAMMER AND F. E. EDWARDS No. 1, p. 53

Contribution on the Mechanism of Photographic Development
R. MATEJEC AND R. MEYER No. 5, p. 265

Correction of Aerial Photographic Tests for Atmospheric Scattering
MILTON D. ROSENAU, JR., FRANK SCOTT, AND WILLIAM F. THIESSEN, JR. No. 2, p. 92

Cyclic Xerographic Method Based on Frost Deformation
E. W. GUNDLACH AND C. J. CLAUS No. 1, p. 14
Damage during Processing, Determining the Resistance of Photographic Emulsions to
J. T. PARKER AND L. J. SUGDEN No. 1, p. 41
Densitometry, Color, Pitfalls of
STANLEY A. POWERS AND ORAN E. MILLER No. 1, p. 59
Density Tablets in the Density Range from 0–4.3, Calibration of Step Wedges and
G. W. SCHUMANN No. 5, p. 262
Design Considerations for a Satellite-Borne Flashing Light
F. T. GRONBERG No. 6, p. 323
Detail Rendition, Sensitivity and, in the Recording of Light Images and Electron Beams
H. F. NITKA No. 3, p. 188
Determination of Modulation-Transfer Characteristics of Photographic Emulsions in a Coherent Optical System
RICHARD E. SWING AND MABEL C. H. SHIN No. 6, p. 350
Determination of Simultaneous Points in Overlapping Satellite Traces Observed from *N* (Number) of Stations
P. G. KIRMSER AND I. WAKABAYASHI No. 1, p. 20
Determining the Resistance of Photographic Emulsions to Damage during Processing
J. T. PARKER AND L. J. SUGDEN No. 1, p. 41
Developer for Kodak Type SO-132 Film
FRANK SCOTT No. 2, p. 128
Development of Internal Latent Image
T. H. JAMES No. 5, p. 304
Development, Photographic, Contribution on the Mechanism of
R. MATEJEC AND R. MEYER No. 5, p. 265
Effect of Spread Function on the Storage of Information on Photographic Emulsions
J. H. ALTMAN AND H. J. ZWEIG No. 3, p. 173
Effects of Penetrating Radiations in Space on Photographic Materials and Other Detectors
A. A. AINTABLIAN, E. E. GAINES, AND J. C. LEWIS No. 3, p. 183
Electrolytic Photography
S. TOKUMOTO, E. TANAKA, C. HARA, O. OGASAWARA, AND S. MURATA No. 4, p. 218
Electron Beams, Sensitivity and Detail Rendition in the Recording of Light Images and
H. F. NITKA No. 3, p. 188
Electronic Displays, Energy–Sensitivity Relationships in the Photographic Recording of
ALBERT J. DERR No. 5, p. 310
Energy–Sensitivity Relationships in the Photographic Recording of Electronic Displays
ALBERT J. DERR No. 5, p. 310
Etching of Microfine Patterns in Nylon Photopolymer
JOHN M. LOHSE AND PAUL F. BRUINS No. 4, p. 238
Experiments on Image Quality in Relation to Modulation-Transfer Function and Graininess of Photographs
H. FRIESER AND K. BIEDERMANN No. 1, p. 28
Factors Involved in the Design of Rapid-Reversal Processing Systems
J. C. BARNES AND L. J. FORTMILLER No. 5, p. 269
Fixing Baths, Artificially and Naturally Exhausted, Retention of Hypo and Silver Complexes by Azo Prints Processed in
DELFIN GALVEZ No. 4, p. 236
Frenkel Defects, Diffusion of Boundary-Layer Equilibria and, in Silver Halide Crystals
R. MATEJEC No. 2, p. 123
Frost Deformation, Cyclic Xerographic Method Based on
R. W. GUNDLACH AND C. J. CLAUS No. 1, p. 14
Herschel Effect at −196 °C
T. H. JAMES, W. VANSELOW, R. F. QUIRK, AND G. GRUM No. 4, p. 226
Hydroquinone, Active Species in Development of Silver Bromide and Silver Iodide by
T. H. JAMES No. 3, p. 164
Image Enhancement, Photographic, by Superimposition of Multiple Images
ROBERT J. KOHLER AND HUTSON K. HOWELL No. 4, p. 241
Image-Forming Systems Based on Photopolymerization
D. W. WOODWARD, V. C. CHAMBERS, AND A. B. COHEN No. 6, p. 360
Image Motion, Influence of, on the Resolution of a Photographic System: II.
DIETER P. PARIS No. 4, p. 233
Image Orthicon Techniques and Satellite Cinematography: ANNA 1-B
GRADY T. HICKS No. 6, p. 328
Image Quality in Relation to Modulation-Transfer Function and Graininess of Photographs, Experiments on
H. FRIESER AND K. BIEDERMANN No. 1, p. 28
Influence of Image Motion on the Resolution of a Photographic System: II.
DIETER P. PARIS No. 4, p. 233
In Memoriam: Charles Ellis Ives No. 1, p. 68
Interferometer, Michelson, to Produce Variable-Frequency Sinusoidal Patterns, Modification and Use of
FRANC GRUM No. 2, p. 96
Internal Latent Image Development of
T. H. JAMES No. 5, p. 304
Ives, Charles Ellis, In Memoriam: No. 1, p. 68
Kalart Soundstrip System
HY SCHWARTZ AND WERNER BENDER No. 5, p. 261
Light Images and Electron Beams, Sensitivity and Detail Rendition in the Recording of
H. F. NITKA No. 3, p. 188
Maximization of Resolution in the Duplication of Aerial Photographs
E. F. YOST No. 2, p. 126
Microfilm, Processed, Microscopic Spots in: Their Nature and Prevention
R. W. HENN AND D. G. WIEST No. 5, p. 253
Microfine Patterns in Nylon Photopolymer, Etching of
JOHN M. LOHSE AND PAUL F. BRUINS No. 4, p. 238

Microscopic Spots in Processed Microfilm: Their Nature and Prevention
R. W. Henn and D. G. Wiest No. 5, p. 253
Minitrack Calibration System
J. H. Berbert, J. D. Oosterhout, P. D. Engels, and E. J. Habib No. 2, p. 78
Minitrack Optical Tracking Systems, MOTS-
D. W. Harris, J. H. Berbert, E. J. Habib, and B. W. McKendree No. 2, p. 73
Modification and Use of a Michelson Interferometer to Produce Variable-Frequency Sinusoidal Patterns
Franc Grum No. 2, p. 96
Modulation-Transfer Characteristics of Photographic Emulsions in a Coherent Optical System, Determination of
Richard E. Swing and Mabel C. H. Shin No. 6, p. 350
Modulation-Transfer Function and Graininess of Photographs, Experiments on Image Quality in Relation to
H. Frieser and K. Biedermann No. 1, p. 28
Modulation-Transfer Functions, Use of Edge Gradients in Determining
Frank Scott, Roderic M. Scott, and Roland V. Shack No. 6, p. 345
MOTS—The Minitrack Optical Tracking System
D. W. Harris, J. H. Berbert, E. J. Habib, and B. W. McKendree No. 2, p. 73
New Vectograph Process
J. Mahler No. 5, p. 287
Objectives, Photographic, Abridged Methods for Determining the Color Contribution of
F. Grum, P. T. Scharf, and J. E. Schlauch No. 6, p. 331
Observation on Fine Structure of Developed Silver in Presence of Added Tone Modifiers
Yasushi Ohyama and Kiyoshi Futaki No. 2, p. 84
On-the-Spot Silver Halide Emulsions
A. Shepp, L. Corben, I. Theodorou, and R. D. Dunker No. 1, p. 48
Penetrating Radiations in Space on Photographic Materials and Other Detectors, Effects of
A. A. Aintablian, E. E. Gaines, and J. C. Lewis No. 3, p. 183
Permanence of Verifax Copies
John L. Ennis and Frank T. Hulswit No. 3, p. 145
Photoflash Ignition Studies
George W. Cressman No. 5, p. 280
Photographic Image Enhancement by Superimposition of Multiple Images
Robert J. Kohler and Hutson K. Howell No. 4, p. 241
Photographic Observations of ANNA, the Geodetic Satellite
Paul B. Swenson No. 6, p. 317
Photography and Photometry of Cathode-Ray Tube Displays: I. Theory and Photometric Results
Rayen W. Tyler and Carlton Straub No. 5, p. 289
II. Photometric Techniques and Instrumentation
Rayen W. Tyler and Vernon I. Saunders No. 5, p. 297
III. Photography
Fred C. Eisen, T. Gentry Veal, and Rayen W. Tyler No. 5. p. 300
Photography of Argon Plasmas
D. C. Smith, M. G. Briscoe, T. P. Anderson, and Ali Bulent Cambel No. 3, p. 177
Photometric Resolving Power of Photographic Emulsions
Leo Levi No. 1, p. 26
Photometry, Photography and, of Cathode-Ray-Tube Displays: I. Theory and Photometric Results
Rayen W. Tyler and Carlton Straub No. 5, p. 289
II. Photometric Techniques and Instrumentation
Rayen W. Tyler and Vernon I. Saunders No. 5, p. 297
III. Photography
Fred C. Eisen, T. Gentry Veal, and Rayen W. Tyler No. 5, p. 300
Photoplastic Recording
Joseph Gaynor and Siegfried Aftergut No. 4, p. 209
Photopolymer, Nylon, Etching of Microfine Patterns in
John M. Lohse and Paul F. Bruins No. 4, p. 238
Photopolymerization, Image-Forming Systems Based on
D. W. Woodward, V. C. Chambers, and A. B. Cohen No. 6, p. 360
Photopolymerization of Acrylamide Initiated by Silver Salts
G. A. Delzenne No. 6, p. 335
Pitfalls of Color Densitometry
Stanley A. Powers and Oran E. Miller No. 1, p. 59
Plasmas, Argon, The Photography of
D. C. Smith, M. G. Briscoe, T. P. Anderson, and Ali Bulent Cambel No. 3, p. 177
Print-Out Papers, High-Speed, Sensitometry of
Ira B. Current No. 2, p. 104
Processes for Making Visible Images of Magnetic Recordings
Lyne S. Trimble No. 4, p. 213
Processing Systems, Rapid-Reversal, Factors Involved in the Design of
J. C. Barnes and L. J. Fortmiller No. 5, p. 269
Relation of Picture Definition of Aerial Photographs to Solar Azimuth
R. N. Wolfe and S. A. Tuccio No. 2, p. 109
Resolution of a Photographic System: II., Influence of Image Motion on
Dieter P. Paris No. 4, p. 233
Resolving Power, Photometric, of Photographic Emulsions
Leo Levi No. 1, p. 26
Retention of Hypo and Silver Complexes by Azo Prints Processed in Artificially and Naturally Exhausted Fixing Baths

DELFIN GALVEZ No. 4, p. 236
Satellite-Borne Flashing Light, Design Considerations for
F. T. GRONBERG No. 6, p. 323
Satellite Cinematography, Image Orthicon Techniques and: ANNA 1-B
GRADY T. HICKS No. 6, p. 328
Satellite, the Geodetic, ANNA, Photographic Observations of
PAUL B. SWENSON No. 6, p. 317
Satellite Traces, Overlapping, Observed from *N* (Number) of Stations, Determination of Simultaneous Points in
P. G. KIRMSER AND I. WAKABAYASHI No. 1, p. 20
Sensitivity and Detail Rendition in the Recording of Light Images and Electron Beams
H. F. NITKA No. 3, p. 188
Sensitometry of High-Speed Print-Out Papers
IRA B. CURRENT No. 2, p. 104
Shutter Programing and Timing System
R. A. WEST AND I. W. RICHARDSON No. 6, p. 340
SO-132 Film, Kodak Type, Developer for
FRANK SCOTT No. 2, p. 128
Soundstrip System, Kalart
HY SCHWARTZ AND WERNER BENDER No. 5, p. 261
Spread Function, Effect of, on the Storage of Information on Photographic Emulsions
J. H. ALTMAN AND H. J. ZWEIG No. 3, p. 173
Step Wedges and Density Tablets in the Density Range from 0–4.3, Calibration of
G. W. SCHUMANN No. 5, p. 262
Subtractive Color Films, Color Reproduction Theory for
J. Q. UMBERGER No. 1, p. 34
Superadditivity with Hydroquinone of Photographic Developing Agents Forming Positively Charged Semiquinones: III. The Influence of Sodium Sulfite and General Considerations
G. F. VAN VEELEN AND J. F. WILLEMS No. 2, p. 113
Systematic Design of a High-Acuity Long Focal Length Reconnaissance Objective for Aerospace Photography
RICHARD J. HEIMER No. 3, p. 157
Tone Modifiers, Added, Observation on Fine Structure of Developed Silver in the Presence of
YASUSHI OHYAMA AND KIYOSHI FUTAKI No. 2, p. 84
Two-Color Photographic Paper and Rapid Process
FRED A. POMEROY AND MAURICE E. WELCH No. 3, p. 161
Unified Approach to Photographic Recording from the Cathode-Ray Tube
LEO BEISER No. 3, p. 196
Use of Edge Gradients in Determining Modulation-Transfer Functions
FRANK SCOTT, RODERIC SCOTT, AND ROLAND V. SHACK No. 6, p. 345
Vectograph Process, New
J. MAHLER No. 5, p. 287
Verifax, Copies, The Permanence of
JOHN L. ENNIS AND FRANK T. HULSWIT No. 3, p. 145
Xerographic Method, Cyclic, Based on Frost Deformation
R. W. GUNDLACH AND C. J. CLAUS No. 1, p. 14
Xerography, Advances in: 1958–1962
C. J. CLAUS No. 1, p. 5
Xerography, Inventor of, Chester F. Carlson:
ALFRED DINSDALE No. 1, p. 1
